

Part M: Technical Referee Report – Temporary Structures (limited to tents and marquees) work

THIS DOCUMENT MUST BE COMPLETED BY THE PERSON PROVIDING THE REFERENCE

What is a Technical Referee Report?

An applicant applying for registration in a category and class of building work must have recent experience in carrying out that work in accordance with relevant standards. The Technical Referee Report provides information about the applicant's work, when it was performed, and the applicant's role in performing that work. It is prepared by a person who has directly supervised the applicant in performing that building work.

This report is used to help determine whether the applicant has sufficient experience to be considered for registration as a building practitioner.

Who can provide a Technical Referee Report?

If the report relates to building work performed in Victoria, the referee should be registered in the category and class (or higher class) of building work for which they are providing the Technical Referee Report. The exception is a referee who is a site manager who is not registered but is reporting to a person who is registered as a building practitioner in the category and class (or higher class) sought by the applicant.

If the report relates to building work undertaken outside Victoria, and that work is performed by registered persons, then the referee should be licensed or registered (or equivalent) in the category of building work for which they are providing the Technical Referee Report.

If the report is about work performed interstate or overseas, and it does not require a person to be licensed or registered, then the referee can be a person who has employed or contracted the applicant to undertake the work.

In addition, the referee must:

- be the person who was responsible for ensuring the work was completed to the appropriate standard. Typically this would be the applicant's employer, supervisor, contract manager or site manager.
- have directly observed the applicant carrying out the work that is listed in the report.

What are my responsibilities as a Technical Referee?

As a Technical Referee, you must:

- provide an accurate and true reference
- NOT give any false or misleading statement or information
- be willing to be contacted by the Victorian Building Authority to confirm or explain further the work that the applicant performed
- sign and date the Technical Referee Report Declaration.
