iunction fitting

Audience

The audience/s for this Practice Note include/s:

- ⊠ Architects/ Designers
- \boxtimes Builders
- Building Surveyors/ Inspectors
- ⊠ Engineers
- □ Home Owners / Residential Tenants

Purpose

This Practice Note provides guidance on the use sanitary and drainage systems.

The content below provides guidance on;

- Junction fittings permitted on grade
- Junction fittings not permitted of grade
- Junctions installed in vertical plane
- Square junctions in drains on vertical mers & as inspection openings
- Junctions permitted for Jurip ups on Sumary Drainage Systems

For guidance on the pluring regulatory framework refer to Plumbing Practice Note Regulatory Framework NF 01 Plumbing Regulatory Framework NCC 2022

Abbreviations & Definitions

The abbreviations and definitions set out below are for guidance only. They are not intended to vary those set out in the Building Act 1993 Plumbing Regulations 2018) or the NCC.

- AS Australian Standard
- AS/NZS Australian/ New Zealand Standard
- NCC National Construction Code
- Regulations Plumbing Regulations 2018

For further information refer to other relevant drainage practice notes: DR-02 Checking bedding material for below ground drainage systems & DR-04 Drains in Reactive soils

Use of sweep junctions

Historically sweep junctions have been installed on grade in both above and below ground sanitary drainage systems. Since this time the design of these fittings has changed to incorporate a reduced throat radius.

An increased occurrence of blockages in sanitary drainage systems has been attributed to the use of sweep junctions installed on grade. This problem is compounded when several sweep junctions are installed near each other, particularly when receiving discharges from soil fixtures. Reduced wastewater flow & flat or reduced grade on drains has also contributed to this problem.

Changes to the deemed-to-satisfy (DtS) standard, AS/NZS 3500.2 no longer permits sweep junctions to be installed on grade. For guidance on the use of sweep junctions in various positions refer to Table 1 Sweep junction (limitations of use).

Use of 45°(OB) junctions

Recent changes to the AS/NZS 3500.2 limit the use of oblique junctions, also known as 45° or OB junctions. The limitations are intended to reduce the likelihood of waste stranding that can occur when wastewater back-washes into junctions that are connected or grade. Table 2 provides guidance on the use of equal 45° junctions in various positions and Table 3 provides guidance on the use of equal 45° junctions on grade.

Use of square (90°) junctions

The use of square junctions is very limited in above and below ground drainage and sanitary pipe work, plumbers must be aware of these limitations when installing square junctions. Table 4 provides guidance on the use of square junctions in above and below ground drainage and sanitary pipe work.

うべん

Table 1- Sweep junction in various positions (limitations of use).

SWEEP JUNCTION ORIENTATION	GENERAL USE AND LIMITATIONS (subject to requirements of the standards)	BELOW GROUND SANITARY DRAINAGE	ABOVE GROUND SANITARY PLUMBING	BELOW GROUND STORMWATER DRAINAGE
SWEEP JUNCTION on grade	 Not permitted in below ground sanitary drainage. Limited used in graded pipes, see referenced clauses for guidance 	NOT PERMITTED	AS/NZS 3500.2:2021- Clauses; • 6.6.2.3 Junctions in graded pipes • 6.6.2.4.1 General • 1.5.16 Connection of ranges of fixtures	AS/NZS 3500.3:2021- Clauses; • 6.3.1.1 Site stormwater drains.
SWEEP JUNCTION vertical, center on grade	 Restrictions apply to connections in sanitary stacks refer to the requirements of the standard May be used at the top of a jump- up May form part of a gully riser 	AS/NZS 3500.2:2021- Clauses; • 4.10- Jump-ups	 AS/NZS 3509.2:2021- Clauses; 6.7/ Unitions in Stacks 6.7. Type: 6.1.2. Installation of pressure attenuators, 8.1.4.5- Common vent for fixtures, 9.8.7.2-Steep offsets, 9.5.10 Connection of ranges of fixtures 	AS/NZS 3500.3:2021- Clauses; • 6.3.1.1 Site stormwater drains, • 7.8 Jump-ups • Figure 7.8
SWEEP JUCTION on back- centre vertical	 Not permitted in below ground sanitary drainage Not permitted in above ground sanitary plumbing system 	NOT PERMINTED	NOT PERMITTED	AS/NZS 3500.3:2021- Clauses; • 7.8 Jump-ups • Figure 7.8
DOUBLE SWEEP JUNCTION all positions	 Not permitted on grade. Limited use in vertical orientation 	NOT PERMITTED	 AS/NZS 3500.2:2021-Clauses; 6.6.2.3 Junctions in graded pipes 6.7.3.1- Opposed connections [same level], 6.7.3.2-At different levels 	PERMITTED

Table 2- 45° junctions in various positions (limitations of use).

DN100 45°(OB) JUNCTIONS ORIENTATION	GENERAL USE AND LIMITATIONS (subject to requirements of the standards)	BELOW GROUND SANITARY DRAINAGE	ABOVE GROUND SANITARY PLUMBING	BELOW GROUND STORMWATER DRAINAGE
DN100 45° JUNCTION Vertical- centre horizontal	 Restrictions apply to connections in stacks refer to the requirements of the standard May be used at the top of a jump-up 	AS/NZS 3500.2:2021- Clauses; • 4.10 Jump-ups	 AS/NZS 3500.2:2021- Clauses; 6.7 Junctions in stacks 6.7.1 Types 6.7.3.1- Opposed connections [same level], 6.7.3.2-At different levels 95-6 Connection from waste fixtures to stack 9.5.10 Connection of ranges of fixtures 	AS/NZS 3500.3:2021- Clauses; • 7.8 Jump-ups • Figure 7.8
DN100 45° JUNCTION on back- centre vertical	 May connect stack to above ground pipework, subject to requirements of the standard May be used in the vertical plane or the connection of a single fixture subject to requirements of the standard May be used at the base on a jump- up 	AS/UZS CA0.2:2021- Clauses; 4.9.2 Junctions installed in vertical plane 6.6.2.5 Junctions in talled in a vertical plane	 AS/NZS 3500.2:2021- Clauses; 6.6.2.5 Junctions installed in a vertical plane 6.8.3 Connection of stacks to graded pipes or drains above ground 9.5.10 Connection of ranges of fixtures 	AS/NZS 3500.3:2021- Clauses; • 7.8 Jump-ups • Figure 7.8
Double 45° JUNCTION Vertical	 Double 45° junctions shall not be used; on grade or, in the horizontal plane or, or the connection of any dram to a graded drain 	AS/NZS 3500.2:2021- Clauses; • 4.9.1.1 General	AS/NZS 3500.2:2021- Clauses; • 6.6.2.3 Junctions in graded pipes	PERMITTED

plumbing dr 05 - junctions in drains superseded 13 dec 2023.docx

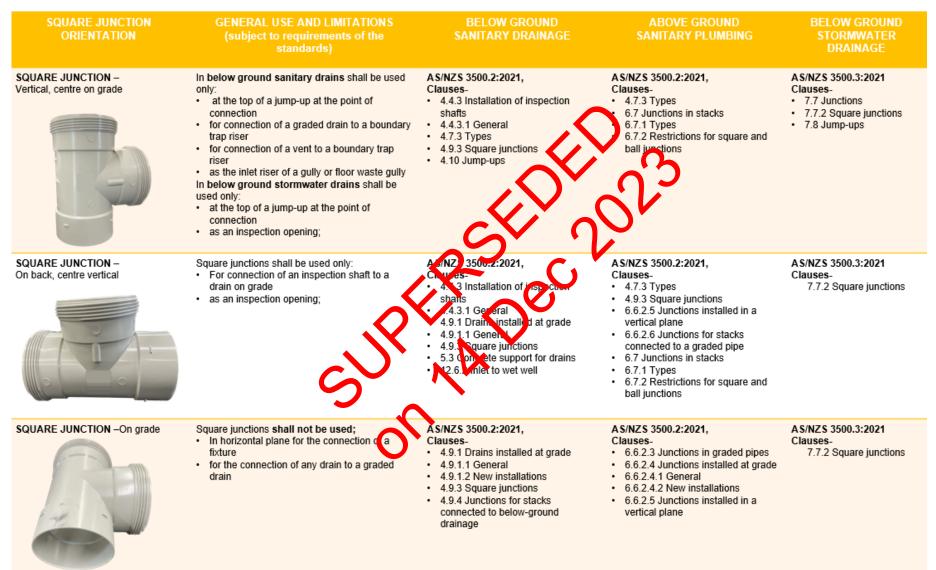

Table 3- 45° equal and unequal 45° junctions on grade (limitations of use).

DN100 45°(OB) JUNCTIONS ORIENTATION	GENERAL USE AND LIMITATIONS (subject to requirements of the standards)	BELOW GROUND SANITARY DRAINAGE	ABOVE GROUND SANITARY PLUMBING	BELOW GROUND STORMWATER DRAINAGE
DN100 45° JUNCTION – 15° above the horizontal.	 Above ground in a new installation - Applies to sanitary plumbing systems, where a 100mm junction connects a 100mm branch, the entry level of the branch pipe must be rotated to 15° above the horizontal. In class 1 buildings, where the 15° cannot be achieved, the incline must be as close as possible to 15° to avoid stranding Below ground in a new installation - Applies to sanitary drainage systems in all classes of buildings, where a 100mm junction connects a 100mm branch, the entry level of the branch pipe must be rotated to not less than 15° above the horizontal. 	AS/NZS 3500.2:2021- Clauses; • 4.9.1.2 New installations	 AS/NZS 3500.2:2021- Clauses; 6.6.2.3 Junctions in graded pipes 6.6.2.4.2 is amended by the Plumbing Code of Australia, Vic C1D3 6.8.3 Connection of stacks to graded pipes or drains above orgund 9.9.10- Connection of ranges of fixture. 	PERMITTED
DN100 45° JUNCTION – On grade.	 Below ground - DN100 junctions may be used on grade for repairs or extensions a existing sanitary drain installations; jfmen are no WC pans connected upstrem; or <u>if</u> the main and branch drains are no D1 100 May be used in combination within a 2° tend for the connection of a stack of a telow ground drain Permitted on grade in a stornward drain. NOTE: There are different requirements for the use of unequal junctions in grade (see below) 	 SIAZS 3500.2:2021- Clauses; 4.9.1.1 General 4.9.1.2 Nr. winstallations 4.1.3 other installations 1.9.4 unctions for stucks connected to below-ground drainage 	 AS/NZS 3500.2:2021- Clauses; 4.9.4 Junctions for stacks connected to below-ground drainage 6.6.2.3 Junctions in graded pipes 6.6.2.4.1 General 6.6.2.4.2 is amended by the Plumbing Code of Australia, Vic C1D3 6.8.3 Connection of stacks to graded pipes or drains above ground 9.5.10 Connection of ranges of fixtures 	AS/NZS 3500.3:2021- Clauses; • AS/NZS 3500.3:2021- Clauses; • 6.3.1.1 Site stormwater drains, • 7.7.1 General • Permitted on grade
Unequal 45° JUNCTION – Invert 10mm higher than soffit.	 Above and below ground in courty and drainage systems - unequal functions may be used on grade if the invert of the branch drain it at least 10mm higher than the soffit of the drain to which it connects May be used in the vertical plane for the connection of a single fixture subject to requirements of the standard. 	A S/NZS 3500.2:2021- Clauses; • 4.9.1 Drains installed at grade • 4.9.1.1 General • 6.6.2.3 Junctions in graded pipes • 6.6.2.4 Junctions installed at grade • 6.6.2.4.1 General	 AS/NZS 3500.2:2021- Clauses; 4.9.1 Drains installed at grade 4.9.1.1 General 6.6.2.3 Junctions in graded pipes 6.6.2.4 Junctions installed at grade 6.6.2.4.1 General 	PERMITTED

- AS/NZS 3500.2:2018 Part 2: Sanitary Plumbing and Drainage

List of Amendments

- · Restructure of information into tabulated format for ease of reading
- Inclusion of pictures to explain orientation of fittings.
- Change of name to include sanitary and stormwater systems and exclude vacuum drainage.
