

Gas installations and appliances update

April 2019

Complex gas installation and Type B acceptance

GasTrac

- From 19 April 2019 ESV will no longer process applications for acceptance received by:
 - Email
 - Fax
 - Mail / hardcopy
- All applications will need to be made via GasTrac online.
- [GasTrac instructional videos](#) are available via ESV website

Complex gas installation and Type B acceptance

GasTrac Key Tips

- GasTrac is a browser based application
- The date format on your browser may need to be changed to DD/MM/YY format
- 'Pop ups' need to be enabled on your browser for some functionality
- If your experiencing difficulties:
 - Check out the user videos on the ESV website
 - Contact Gas Technical Enquires – Phone 1800 652 563 (Select option 4)

Gas heater safety alerts

- **Vulcan** and **Pyrox Heritage** gas space heaters

Pick up our flyer when you leave.

Gas Heater Service Work and CO

Are you ready for the winter rush?

- VBA Web Site
 - [Carbon Monoxide Safety Program](#)
 - Attend a ESV VBA Master Plumbers CO Seminar (New test method)
- View:
 - [ESV's Negative Pressure video](#)
 - [ESV Information Sheet 38](#) Updated 6 May 2019
- Print copies of:
 - [Open flue gas space heater inspection and service advice letter](#)
 - Carbon Monoxide Spillage Test Report
- Ensure your CO detector is calibrated and fit for purpose

Complex gas installation non compliance

Commercial kitchens

- 30% of all non compliances are found in commercial kitchens
- 50% of all non compliances are related to kitchens
(45% in commercial buildings / 5 % in residential > 5 storeys)
- This high number is driving ESV strategy
 - » Educate – [Tech info sheets](#), [instructional videos](#), road shows, RTO visits, industry discussions, changes to standards
 - » Encourage – Contacting gasfitters with systemic / high non compliance rates
 - » Enforce – Zero tolerance infringement notices
